Integrity. Commitment. Innovation.

PRODUCT CATALOG

ZNK LASER TECHNOLOGY

Company Introduction

ZNK Laser Technology (Jiangsu) Co., Ltd. is a professional company dedicated to providing one-stop products and services for laser optics and maintenance of laser industrial equipment.

ZNK offers a variety of consumables and key components related to laser machines. Our services cover on-site maintenance of laser industrial equipment, retrofitting and upgrading of key components and devices, as well as training and promotion of new technologies for laser industrial applications.

With over 13 years of experience in the laser field, ZNK's team of professional engineers provides every customer with more optimal solutions.

Company Overview

Consumables & Parts

All essential consumables including protective lenses, nozzles, ceramic rings, focus lenses, TRA sensor lines, and more.

Laser Handheld Welder

Water-cooled and air-cooled models available. Customizable laser chillers. Standard equipped with SUP Torch.

Cutting Heads

Wide range of models and brands: Raytools, WSX, Ospri, Precitec, Boci, etc.

Fiber Laser Chillers

Various brands: Hanli, TEYU

Fiber Laser Sources

Leading brands: Raycus, MAX, bwt, etc.

Professional Repair Services

Laser Source Repair

Cutting Head Repair

Handheld Welding Machine Repair

Laser Cutter Power Upgrade

Equipment First-class Maintenance Equipment and Professional Maintenance Personnel

Advanced Repair Equipment

Professional Technical Team

On-site Service Available

Official Authorization

Services include: laser cutters, laser welders, laser markers, laser source repair, power upgrades, laser head repair, fiber laser equipment, protective lenses, focus/collimation lenses, nozzles, ceramic rings, capacitive heads, RF cables, QBH cutting heads, and other consumables.

Bochu Amplifier BCL-AMP

Signal Amplification:

Precisely amplifies weak sensor signals to ensure accurate recognition and processing by the control system.

Stable Constant Current Supply:

Features an internal stable constant current bridge to provide reliable power for sensors and subsequent circuits, ensuring system stability and preventing cutting accuracy loss or device failure due to current fluctuations.

SE001 Amplifier (Weihong)

Features:

Converts capacitive signals between the cutting nozzle and workpiece into variable-frequency square waves for follow-up controllers.

Supports 16-point capacitive calibration, actively identifies anomalies during calibration (e.g., excessive signal fluctuations or trend errors), and allows nozzle loss point calibration.

Raytools ETSTTAF0102 Amplifier

Features:

Amplifies sensor signals to enable height control boxes to accurately recognize and process data, achieving precise height follow-up control.

Operating Environment & Parameters

Equipment Model	ZNK1500	ZNK2000	3000W
Laser Power Adjustment	10%-100%		
Wire Diameter	0.8-1.6mm (Standard)		
Weld Seam Gap Requirement:	Autogenous Welding: $\leq 15\%$ of Plate Thickness & $\leq 0.5\text{mm}$, Wire-Fed Welding: $\leq 1.2\text{mm}$		
Max. Air Pressure	15Bar		
Cooling Method	Water Cooling		
Laser Wavelength	1064nm ($\pm 10\text{nm}$)		
Output Power	1500W	2000W	3000W
Operating Temperature	10-50°C		
Welding Thickness	$\leq 4\text{mm}$	$\leq 6\text{mm}$	$\leq 8\text{mm}$
Standard Fiber Length	10m		
Torch Weight	$\leq 0.75\text{kg}$		
Welding Scan Width	0-8mm		
Vertical Focal Adjustment Range:	$\pm 10\text{mm}$		
System Languages:	19 Languages Including Chinese, English, Korean, Russian, Japanese, German, French		

Water-cooled laser Handheld Cleaning Machine

◆ Product Feature

- Product Features:** Supports cleaning up to 3000W with safety alerts and easy operation.
- Enhanced Stability:** Real-time monitoring and proactive troubleshooting ensure reliable performance.
- Unique Gas Knife Design:** Increases gas flow to protect the lens from contamination.
- High Repeatability:** Stable structure and consistent laser power guarantee efficient, repeatable results.

◆ Operating Environment and Parameters

Equipment model	1500W/2000W	3000W
Rated Voltage	220V	380V
Installation Environment	Flat surface, free from vibration and impact	
Operating Temperature	10-40°C	
Operating Humidity	<70% RH	
Cooling Method	Water Cooling	
Applicable Wavelength	1064nm (±10nm)	
Maximum Supported Power	≤3000W	
Max. Air Pressure	15 Bar	
Vertical Focal Adjustment Range	±10mm	
Scanning Width (Cleaning)	F400: 0-150mm, F600: 0-225mm, F800: 0-300mm	
System Languages	Simplified Chinese, Traditional Chinese, English, Japanese, Korean, Russian, German, French

Parameter Specification	
Laser Type	Fiber Laser Generator (2nd Gen)
Output Power	20W / 30W / 50W
Marking Range	100×100mm/150×150mm/175×175mm
Galvanometer Scanner	High-Precision 2D Scanning System
Laser Wavelength	1064nm
Marking Speed	≤7000mm/s
Operating System	Linux
Marking Type	Integrated Dot Matrix & Vector
Line Width	0.03mm
Repositioning Accuracy	0.01mm
Positioning Method	Red Light Positioning & Focusing
Character Lines	Unlimited within valid marking range
Printing Speed	800 characters/s (Material and content dependent)
Font Support	Chinese, English, Numbers, Traditional Chinese, etc. (Standard font library)
File Formats	BMP, DXF, HPGL, JPEG, PLT
Barcode Support	CODE39, CODE128, CODE126, QR Code
Power Supply	222Wh/10Ah
Power Consumption	≤250W
Operating Temperature	0-40°C
Weight	4.5-7.0kg (4.5-6kg for plug-in version; 5.5-7kg for battery version)

Metal Deburring Machine

- Surface Brushing, Molten Slag & Burr Removal
- Powerful Suction Force: Securely Holds Smaller Workpieces.
- Automatic Abrasive Compensation
- Process Parameter Memory
- Automatic Cleaning of Suction Chamber
- Smart Sensor Protection
